5. Connecting with a Smartphone

5-1. Media Sharing Connection – Android

Media Sharing is a function that plays various media contents stored in Android phone by connecting WiMESH and Android phones. In order to use this function, the WiMESH application must first be installed in the Android phone.

1) Application Installation

[Android Market]

Search on Google Market for "WiMESH GI-9000"

When searched, an installation button will appear like the screen on the left above.

Install the application for WiMESH by clicking the 'installation' button on the display.

When the installation is finished, the WiMESH icon will be seen on the home screen like the screen on the right above.

3) WiMESH Application

[Running WiMESH Application]

After connecting WiMESH WiFi, run the application for WiMESH.

<Warning>

When connecting the Sharing function, a smartphone acknowledges a connected-WiMESH as a WiFi AP(Access Point), therefore, users cannot use the Internet via data communications of CDMA network nor applications that use data communications. But, users can freely use voice calls, texting, and other applications that do not use data communications.

[Sharing Mode]

On Android phones display, the remote control keys are displayed, like on the left below.

Using the keys on Android phones display, turn the pointing arrow to Sharing Mode, then press 'OK' to run the mode.(It can also be done by the actual remote control unit.)

[Sharing Mode]

When the Sharing Mode is properly running, the WiMESH display will be like the left image below; and Android phones on the right, displaying the selection screen for media contents in Android phones.

5-2. Media Sharing Connection – iPhone

Media Sharing is a function that plays various media contents stored in iPhone by connecting WiMESH and iPhone. In order to use this function, the WiMESH application must first be installed in iPhone.

1) Application Installation

[iPhone App Store]

Search on App Store for "WiMESH GI-9000"

When searched, an installation button will appear like the left screen above. Install the application for WiMESH by clicking the 'installation' button. When the installation is finished, the WiMESH icon will be seen on the home screen.

2) WiFi Connection between WiMESH and iPhones

[Main Menu of WiMESH]

In the main menu of WiMESH such as the image below will be displayed, where an input selection can be made.

[WiFi Connection]

Connect to WiMESH WiFi on the Android phone.

Each 'WiMESH' device has its own serial numbers at the end of each device's name. (The serial numbers can also be checked at the "WiFi Setting" within the System Setting. The initial password for connection is "1234567890", and it is automatically connected after the initial connection.)

<Warning>

When connecting the Sharing function, a smartphone acknowledges a connected-WiMESH as a Wi-Fi AP(Access Point), therefore, users cannot use the Internet via data communications of CDMA network nor applications that use data communications. But, users can freely use voice calls, texting, and other applications that do not use data communications

3) Storing Media Contents in WiMESH application

Run iTunes on the computer and connect with user's iPhone.
