Cautions

▪ Device-related

- You should check the names and colors of each wires exactly, before you connect the wires.
ex) CAN HIGH: White wires / CAN LOW: Blue wires
- The 'POWER / CAN Cable' should always be connected last and be disconnected first.
- The 'Mode Switch' is an optional part to change modes forcibly without CAN-BUS. Generally, the CAN-BUS wires are connected for changing modes by original buttons.
- When the reverse gear is not detected by CAN-BUS, the 'REVERSE 12V IN wire' should be spliced with 12V power of reverse light.

▪ HDMI device-related

- If screen size of HDMI does not fit on the monitor, should adjust screen size & position in 'settings mode'.
- Generally, '5V 1A Power output(5V USB POWER)' is a standard voltage for charging smartphone. If you need higher voltage than 5V, you should add a separate power supply.

▪ Navigation(GPS) box-related

- When you connect the power wires(B+, ACC) to the navigation(GPS) box, the 'NAVI (12V) OUT' wire supported by the device should be spliced with an ACC wire of navigation box.
- After installation is done, select an applicable navigation(GPS) box model in the 'Navigation model selection menu' of setting mode.
- The navigation box should be powered off before unplugging the HDMI cable.

Button	Function	Operation
Touch the oem screen	Enter into the setting menu	Touch the oem screen 5 seconds long.
Touch Screen (OEM Monitor)	All functions of setting menu of IW03GF is controlled by a touch screen of the OEM monitor.	

1. Enter into the setting menu.

<Press the 'OPTION' button 5 seconds long.>

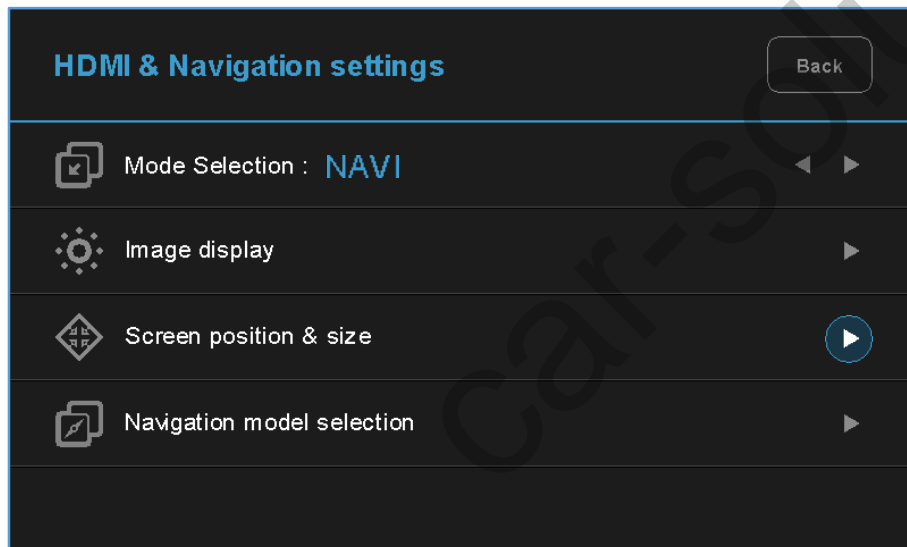

- HDMI & Navigation settings
- Rear view camera settings
- AV-input settings
- System settings
- System information

Settings

2. HDMI mode settings

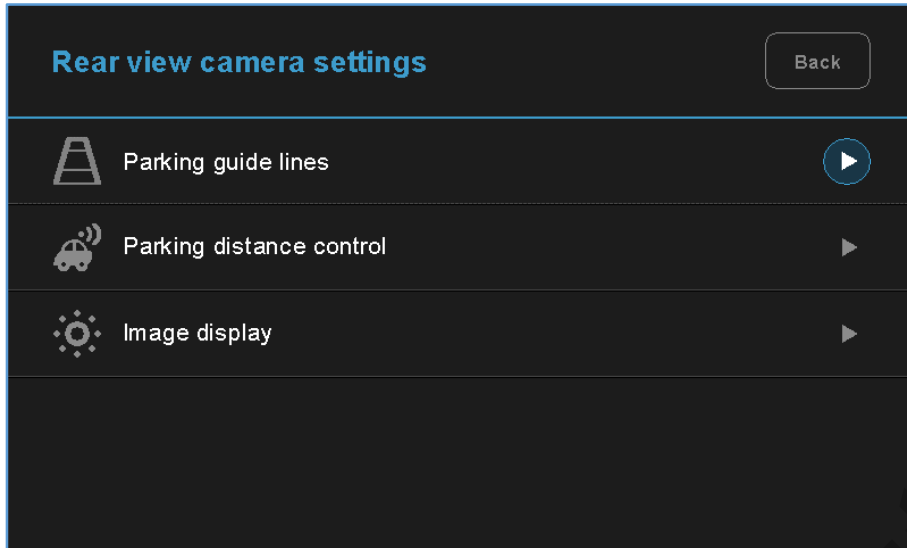

- Mode selection: HDMI ↔ NAVI
- Image display
= Adjust the values of brightness and contrast
Red-Green-Blue colors of HDMI display.
- Screen position & size
= Entry Disabled / Not applicable.

3. NAVI mode settings

- Mode selection: NAVI ↔ HDMI
- Image display
= Adjust the values of brightness and contrast
Red-Green-Blue colors of NAVI display.
- Screen position & size
= Entry Disabled / Not applicable.
- Navigation Resolution selection
= Entry Disabled / Not applicable.

Settings

4. Rear view camera settings

- **Parking guide lines**
= Adjust position of parking guide lines and select the lines 'ON or OFF'.
- **Parking distance control**
= Adjust the position of parking distance control sensors to 'LEFT or RIGHT' and select the PDC 'ON or OFF'.
- **Image display**
= Adjust the values of brightness and contrast
Red-Green-Blue colors of Rear view camera display.

5. AV1(Front view camera) settings

- **Mode selection: AV1(Front view camera) ↔ AV2**
- **Image display**
= Adjust the values of brightness and contrast
Red-Green-Blue colors of AV1(Front view camera) display.
- **Screen position & size**
= **Entry Disabled / Not applicable.**
- **Automatic activation function(AV1)**
= *** Please refer to next page.**
- **Parking distance control**
= Adjust the position of parking distance control sensors to 'LEFT or RIGHT' and select the PDC 'ON or OFF'.

Settings

6. Automatic activation function(AV1)

- Shift gear from reverse to drive
- Shift gear from parking to drive

* When you shift gear 'from reverse to drive' or 'from parking to drive', it just works automatically during the activation time you selected.

7. AV2 settings

- Mode selection: AV2 ↔ AV1(Front view camera)
- Image display
= Adjust the values of brightness and contrast
Red-Green-Blue colors of AV2 display.
- Screen position & size
= Entry Disabled / Not applicable.

Settings

8. System settings

- Safe mode
= Select the one of two between 'ON and OFF'.

* If you select 'ON', 3 modes(HDMI, NAVI and AV2) will be faded out when the car is driven.

- Factory default
= Reset all setting values to factory default setting.

9. System information

- Mode name :
- Firmware date : 2017 – 06 – 09 (Latest firmware date)
 - = You can check the current firmware version date.
- Dip switch settings
= You can check the current positions of dip switch settings.
