★ PHILIPS Bran-new ZES Gen 2 Light Source ★

PHILIPS

ZES Gen 2 Light Source

With New Gen chip technology. The ZES Gen 2 Light source, Compared with Gen 1, has promoted the light efficiency up to 15%, and enjoyed better Temperature Resistance, Higher Luminous Flux up to 6000LM, and longer life span for over 30000 hours.

Low Beam

High Beam

★ Multiple color temperature options ★

Configure three kinds of film, arbitrary color temperature.
Replaceable different color temperature tube depending
on different driving conditions
Let the driving safety guaranteed

3000k
Golden light

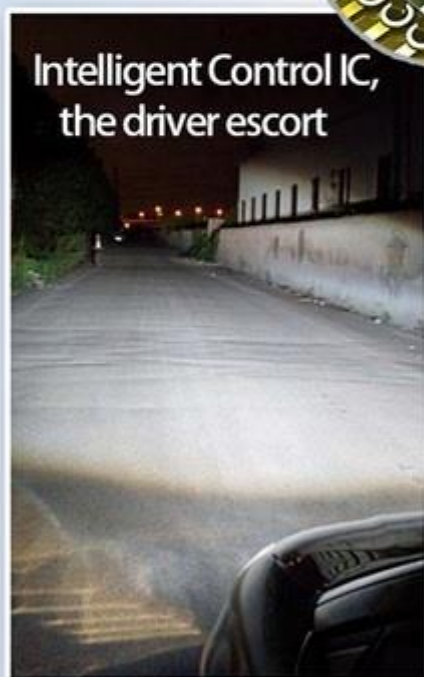

6500k
nature white light

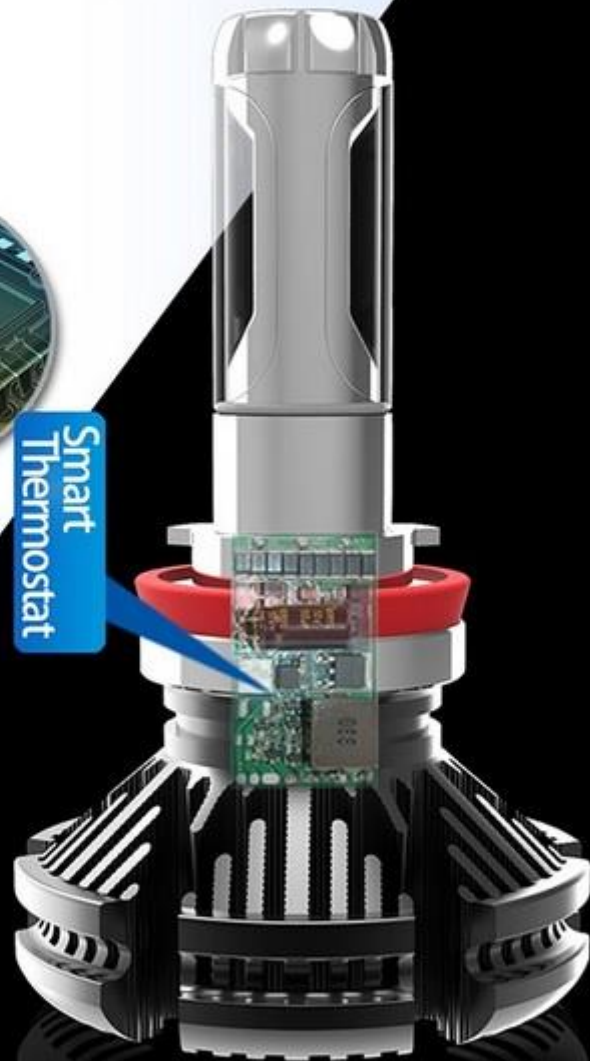

8000k
Cool white light

★ Intelligence and Dynamic integrated driver ★

The New Gen Intelligent control IC of US MPS, with highly integration and Intelligent temperature control system, can automatically identify whether the vehicle is in a state of driving or resting. When the vehicle is stationary, it will automatically reduce the current to protect the LED lamp. While When the vehicle runs, according to the temperature conditions of the LED lamp's radiator, it will automatically increases the working power of the LED lights to improve illuminating brightness so as to increase driving safety.

Smart
Thermostat

★ Well - crafted, Human-oriented design ★

Analog design, Streamlined top. Can avoid all the car hood, the situation for unable to installed won't appear.

X3 LED Headlight

Original car tungsten lamp

Other Car Lamp

X3 LED headlights **perfectly consistent with the size of the original car tungsten lamp.** Space-saving, does not destroy the original car cover, more in line with user-friendly design.

High Brightness 6000LM

Wonderful light shape,
Central light concentrates well,
High Brightness, Long Range.

Low

High Beam

Low highlight beam,
more than 3 times brighter than Halogen lights.

Irradiation Distance for High beam can
reach up to over 200m.
