➤ Cable and Connectors

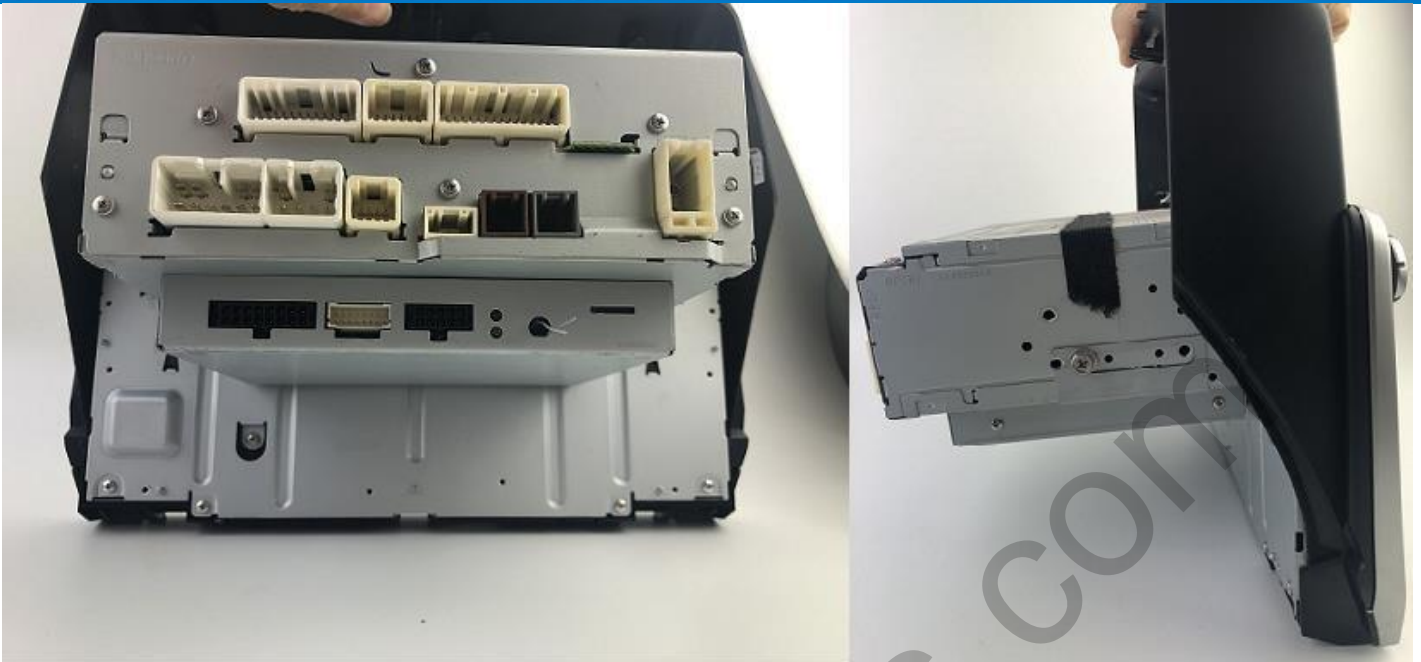

➤ Flat cable connection

Toyota head unit has one set or two set flat cable as above photo, it will replace OEM Flat cable to connect to same plug on head unit and screen Panel . This way, it need dismantel the CD ad Panel as below

Remove the flat cable that connect the Head Unit and Screen Panel ,use the flat cable of Interface Only

Interface module undercut the head unit metal part as photo above. This way flat cable direction is fixed .

I. Insert the flat cable to the terminal of head unit as photo ,pls connect carefully and fixed it very stable

II. Insert the another flat cable from the hole of the metal board as photo

Then connect with the terminals on the screen panel,it's finished the flat cable connection as photo III .

➤ **Audio Convert:**

- 1 Please choose AUX option on original menu before switching to Interface.

➤ **Setting**

1. Long press Menu button on panel to switch to interface
2. Bluetooth pairing code: **8362**
